SUBJECT: Threaded Connections – Copper Pak & Efficiency Pak Products

Lochinvar is committed to continuous quality improvement and hold regular product reviews to ensure we are manufacturing the best product possible. During a recent review we discovered an opportunity to enhance the water tight seal of the threaded connections used on the Copper Pak and Efficiency Pak products.

A new process has been implemented to apply Teflon tape, a thread sealing compound, and test the connections perform hydrostatically. This improvement process was implemented on the Copper Pak and Efficiency Pak units having serial numbers of H08 and after. Should you have any questions please feel free to contact Technical Service at 1-800-722-2101.
