

Custom Packaged Solutions

For as many custom applications of water and space heating needs exist, there are as many combinations of equipment from which to choose. Lochinvar has all the bases covered. Whether your specification requires water heaters, boilers, or both - your needs can be met with exceptional efficiency and ease.

For years Lochinvar has been packaging water heaters with tanks in order to ease installation costs and complexity of domestic hot water systems. Now, Lochinvar is taking their proven custom capabilities to the next level with custom, pre-piped boiler packaged systems.

FEATURES

Fitted and Pressure Tested Piping

all packages are completely assembled and pressure tested before shipment.

Channel Iron Steel Frame

all equipment is secured to a steel frame for ease of installation, larger frames will be designed in multiple pieces which can be disassembled for shipping.

Wiring of Associated Pumps, Accessories and Safety Devices

all specified and factory installed pumps and safety devices such as a flow switch or low water cut-off will be installed and wired prior to shipment.

OPTIONS

Pre-Piped and Pressure Tested Gas Piping

Pre-Wired Supply Voltage to a Single Access Connection With Conduit

Stacking Frame

Customer Specified Expansion Tank, Gauges and Pumps
